## ABOUT

---

Dutch ( **Frontend** ) engineer with a degree in **graphic design** and over **eight** years of experience building scalable web applications across **B2B** and **B2C** e-commerce, **open-source govtech** , large **SaaS** platforms, and **e-learning** environments.

Focus on **developer experience** , **accessibility** , **performance** , and **scalable architectures** , making deliberate technical choices that support long-term velocity.

Actively integrating **AI** into products and internal tooling, building automation and developer workflows while staying closely engaged with modern frontend and fullstack technologies not exclusive to web.

## EXPERIENCE

---

### Front End Developer 2025 - Present

Brainstud / Allyoucanlearn

- Building an e-learning platform with Next.js, TypeScript, and React Query serving multiple educational institutions.
- Delivering scoped features end to end under the Shape Up methodology in six-week cycles.
- Integrating with a Laravel backend through a custom REST layer, coordinating across front-end and back-end teams.

### Front End Developer 2023 - 2025

Pleio

- Worked on fully open-source government platforms used by multiple Dutch ministries and municipalities, built with React, GraphQL, and Django.
- Rebuilt the front-end of the FSV fraud detection platform, improving structure and maintainability.
- Helped maintain and extend a core intranet site builder used across government institutions in the Netherlands.
- Brought existing applications in line with WCAG AA accessibility standards.

### Software Developer 2022 - 2023

Lasaulec / Distil

- Rebuilt the complete webshop front-end using Razor, SCSS, and JavaScript, improving page structure and UX.
- Worked independently on React-based internal tools, shipping features from design to production.

### Front End Developer 2016 - 2022

Tickles

- Built and maintained custom Magento 2 webshops for a range of B2B and B2C clients.
- Handled front-end implementation across multiple projects, working with PHTML templates, BEM and SCSS, and JavaScript.
- Grew from junior to independently delivering client-facing work across multiple concurrent projects.

## SKILLS

---

**Languages:** TypeScript · JavaScript · Shell (bash, fish, zsh) · Scripting (Python, Lua)

**Frameworks:** React · Next.js · TanStack Start · Solid · Svelte

**Backend:** Node.js · Express · Hono · Elysia · SSR · RSC · Next.js Server Actions · Route Handlers · Serverless and Edge runtimes (Vercel, Cloudflare Workers) · BFF

**Databases:** PostgreSQL · SQLite · LibSQL · Turso · Drizzle ORM · Prisma

**Tools:** Git · Docker · CI/CD · Vite · pnpm · Bun · Linux · SSH · CLI tooling

**Styling:** CSS · SCSS · Styled Components · Tailwind CSS

**Design:** Figma · Photoshop

**AI:** API integration (Vercel AI SDK, OpenRouter) · Automation and internal tooling

**Miscellaneous** Playwright · Vitest · GitHub Actions · Vercel · Cloudflare · GraphQL · REST · tRPC · Monorepos · WCAG and a11y

**Spoken:** Dutch (Native) · Frisian (Native) · English (Professional)

**EDUCATION**

---

**Graphic Design Degree — ROC Friese Poort Sneek** 2012 - 2016

---
