ABOUT

Front End Engineer with eight years of experience across SaaS, e-commerce, government platforms, and e-learning systems. Graphic Design degree brings strong visual design sensibility to technical implementation. Focused on TypeScript, React, Next.js with strong product thinking and autonomy.

EXPERIENCE

Front End Developer   2025 — Present
Brainstud / Allyoucanlearn
- Building a modern e-learning platform with Next.js, TypeScript and React Query.
- Working under the Shape Up methodology delivering scoped and iterative features.
- Collaborating with a Laravel backend team through a custom REST layer.

Front End Developer   2023 — 2025
Pleio
- Developed fully open source government platforms using React, GraphQL and Django.
- Rebuilt the FSV fraud detection platform in JavaScript, SCSS and Django.
- Improved reliability and maintainability of a core intranet site builder used across government institutions.
- Implemented WCAG AA compliance and accessibility standards for government applications.

Software Developer   2022 — 2023
Lasaulec / Distil
- Rebuilt the complete webshop front-end using Razor, SCSS and JavaScript.
- Delivered production features autonomously for React-based internal applications.

Front End Developer   2016 — 2022
Tickles
- Built custom Magento 2 webshops for B2B and B2C clients using PHTML, BEM SCSS and JavaScript.

Frameworks:	React · Next.js · Qwik · Solid · Svelte · TanStack Query
Backend:	Node.js · Hono · Express
Databases:	PostgreSQL · SQLite · LibSQL · Turso · Drizzle ORM · Prisma
Tools:	Git · Docker · Vite · pnpm · Bun · CI/CD · Linux · SSH · DX tooling
Styling:	Tailwind · (S)CSS · Styled Components
Design:	Figma · Photoshop
Spoken:	Dutch (Native) · Frisian (Native) · English (Professional)

PROJECTS

Skriuw [app] (In active development)
A local-first desktop application for writing and organizing thoughts. Built with Tauri 2.0 and React, Skriuw blends note-taking and task management into a fast, private workspace with Markdown editing and offline access.
https://skriuw.vercel.app

Fync [api]
Unified API wrapper for GitHub, Vercel, NPM, Google Calendar, Discord, Spotify and others.
https://fync-docs.vercel.app/docs

Drizzleasy [api]

CRUD generator for Next.js using Drizzle ORM with chainable syntax.

https://drizzleasy.vercel.app

Beautiful Code Block [ui-component]

React component for displaying syntax-highlighted code blocks with search, line numbers, and interactive features.

https://beautiful-codeblock.vercel.app/

Beautiful File Tree [ui-component]

React component for visualizing project folder structures with interactive tree views and customization options.

https://beautiful-file-tree-v2.vercel.app

EDUCATION

Graphic Design Degree — ROC Friese Poort Sneek   2012 — 2016

Built with Next.js and Tailwind CSS, deployed on Vercel.
